

Arizona-New Mexico Telecommunications Association, Inc.

Antitrust Statement

The Arizona New Mexico Telecommunications Association, Inc. ("Association") is a not-for-profit organization. The Association is not organized to and may not play any role in the competitive decisions of its members or their employees, nor in any way restrict competition among members or potential members. Rather it serves as a forum for a free and open discussion of diverse opinions without in any way attempting to encourage or sanction any particular business practice.

The Association provides a forum for exchange of ideas in a variety of settings including its annual meeting, educational programs, committee meetings, and Board meetings. The Board of Directors recognizes the possibility that the Association and its activities could be viewed by some as an opportunity for anti-competitive conduct. Therefore, this policy statement clearly and unequivocally supports the policy of competition served by the antitrust laws and to communicate the Association's uncompromising policy to comply strictly in all respects with those laws.

A conviction can carry stiff fines for the association and its offending leaders, jail sentences for individuals who participated in the violation, and a court order dissolving the association or seriously curtailing its activities. The antitrust laws can be enforced against associations, association members, and the association's employees by both government agencies and private parties (such as competitors and consumers) through treble (triple) damage actions. As the principal federal antitrust law is a criminal conspiracy statute, an executive who attends a meeting at which competitors engage in illegal discussions may be held criminally responsible, even if he or she says nothing at the meeting. The executive's attendance at the meeting may be sufficient to imply acquiescence in the discussion, making him or her liable to as great a penalty as those who actively participated in the illegal agreement.

The antitrust laws prohibit competitors from engaging in actions that could result in an unreasonable restraint of trade. Above all else, association members should be free to make business decisions based on the dictates of the market – not the dictates of the Association.

Some activities by competitors are deemed so pernicious and harmful that they are considered per se violations – it does not matter whether or not the activities actually have a harmful effect on competition; the effect is presumed. These generally include price fixing, allocation of customers, markets or territories, bid-rigging, and some forms of boycotts. In addition, there are many features that factor into price; agreements as to warranty duration, freight terms, or other factors that can directly impact price also are proscribed.

Other actions, such as standards development, certification programs, and relationships between distributors and suppliers generally are evaluated under a rule of reason – there is a balancing between the pro-competitive and anti-competitive aspects of the activities; the pro-competitive effects must outweigh the anti-competitive ones. These areas also should be approached with caution and legal guidance.

Given the severity of such penalties, the Board intends to take proper measures to ensure that violations of the antitrust laws do not occur.
